

The PTFA is hoping to have a plant sale next year to help raise more funds for the school, but it requires getting started now. Cuttings are best taken in the spring, summer or autumn and nurtured over winter, making them ready for planting in the spring. Taking cuttings are a great way to teach your children or grandchildren about plants and how they grow. So even if you can only donate a few plants it can still be fun and educational.

Don't worry if you don't know how to take cuttings, below are a variety of websites you can consult to help get you started.

Royal Horticultural Society

- Harwood cuttings - <http://www.rhs.org.uk/advice/profile?PID=387>
- Root cuttings - <http://www.rhs.org.uk/advice/profile?PID=407>
- Semi-ripe cuttings - <http://www.rhs.org.uk/advice/profile?PID=404>
- Softwood cuttings - <http://www.rhs.org.uk/advice/profile?pid=307>
